JANUARY 2024

The wind power sector is at a very nascent stage in the Asia-Pacific region and there is a rapidly growing demand for more renewable energy. Acting as the industry representative, the Asia Wind Energy Association aims to capitalize on this opportunity. Established in December 2016, the Asia Wind Energy Association is the leading trade association for the onshore and offshore wind energy sector in Asia Pacific.

The association aims to develop and communicate conclusive policies to support energy regulators and governments in providing better policies for the wind sector and to create a positive investment environment for developers and investors. This will lead to a faster deployment of wind energy in the Asia-Pacific region.

The Asia Wind Energy Association acts as the regional platform for all wind power industry stakeholders to collectively promote the best interests of the wind power sector. Members include power project developers, turbine manufacturers, technical consultants, financial institutions, regional associations and other institutions in the wind energy sector.

The Asia Wind Energy Association is supported by a wide variety of stakeholders from the offshore and onshore wind industry. Among our members are the following companies:

Silver Members

Basic Corporate Members

Partner Organizations

The Asia Wind Energy Association organizes a range of events throughout the Asia-Pacific region every year. These events include member network gatherings, full-day seminars focusing on technical issues, industry roundtables and the Asia Offshore Wind Days.

As a member, you will be entitled to attend these events either for free or at a discounted fee. In addition, the Asia Wind Energy Association issues publications through the year, providing insights into the latest developments in the wind sector within Asia-Pacific, updates on policies and related interviews with regional industry and officials and regulators. You would also be receiving an Annual Wind Industry Guide of all companies and organizations active in the wind sector in the region.

Below is an overview of the benefits for each member category:
